OBJECTIVE

FFA has been the most influential organization in my high school and life. I believe that as the leading youth leadership organization in the nation, FFA is the most apt organization to prepare students with the skills necessary for college, career, networking, and non-work relationship building. As a state officer, it would be my goal to empower students, teachers, and industry leaders to deepen their involvement in the FFA. I believe the outcome of achieving this goal would be a more prepared and successful future for agriculture.
